

Herpes Zoster Chart: Full Illustrated Guide to Shingles

What is Herpes Zoster?

Herpes zoster, also known as shingles, is a viral infection that causes a painful rash. The rash typically appears on one side of the body and is characterized by blisters that can be filled with fluid or pus. Shingles is caused by the varicella-zoster virus, which is the same virus that causes chickenpox. After you have had chickenpox, the virus can remain dormant in your body for years. In some cases, the virus can reactivate and cause shingles.
