

Step By Step Guide From Idea To Business Plan To Growth

Everything You Need to Know About Starting and Growing Your Own Business

How to Develop a Business Plan

- 1 RESEARCH THE MARKET**

Analyzing your competition helps you make business decisions like determining price point and product line, and also helps you shape your business model so you stand out from the others.
- 2 DECIDE ON A LEGAL STRUCTURE**

The legal structure of your business - sole proprietorship, partnership or limited liability company, for example - determines your personal liability, how much you pay in taxes, and what paperwork you'll need to complete. Once you've chosen the right entity for your concept, you can begin planning the details of your business.
- 3 RUN THE NUMBERS**

New business owners often don't estimate the right amount of funding they'll need to get their companies off the ground. Carefully evaluate all areas of your business to make sure you ask for enough financing in your business plan.
- 4 CONDUCT A SWOT ANALYSIS**

SWOT stands for strengths, weaknesses, opportunities and threats. Identifying these elements in your business helps you organize the information that must be in your plan.
